

When you think ink, think antonine | PRINTING INKS LTD

BELLARIA

Water-based flexographic inks

Inks suitable for surface printing on various paper substrates, corrugated board & carton board. Developed to provide high colour strength & gloss coupled with excellent drying performance & resolubility.

- Fully Pigmented
- Fast drying
- Excellent rub and crinkle resistance
- Moisture resistance
- Grease resistance
- Suitable for cold storage
- Meets Nestle® packaging guidelines
- Non-flammable
- Non-toxic

VISCOSITY: Reduction to press viscosity is with water only. Press viscosity is determined to some extent by colour and design, anilox roller, screen & machine speed. This can be as low as 17" din4 and as high as 30" din4.

FOAMING: Whilst formulated to minimise foaming, some ink circulation systems may cause excess foaming; in such cases, a small addition of antifoam will prevent this.

AVAILABILITY: We can supply the complete colour range of inks, whether standard colours, Pantone® matching, process, or specialist matches. Available in buckets, barrels, or IBCs.

SUITABILITY: The Bellaria ink system is designed for use in indirect food contact applications. The user must test and ensure the suitability of the articles for their specific application, including compliance with any relevant limitations, before introducing them into circulation.

STORAGE: Inks should be stored in the original, unopened, and undamaged containers in a dry place at temperatures between 5°C and 25°C. Protect from frost and extended exposure to direct sunlight and heat.

SUSTAINABLE INKS THROUGH INNOVATION

Through research, development and procurement of **sustainable raw materials**, our range of **water-based ink systems** are environmentally friendly to the print and packaging industry.
